RAWABI CORROSION TECHNOLOGY

Rawabi Corrosion Technology Company (RCT), a fully owned subsidiary of Rawabi Holding, was formed in 2006 from the former ABACORP Corrosion Control Group with a mission to provide a comprehensive and market leading range of Cathodic Protection and Corrosion Control Solutions.

RCT's core business is the provision of Cathodic Protection Engineering Services and Equipment to the Oil & Gas, Petrochemicals, Civil Construction, Power and Water Sectors in Saudi Arabia and the GCC region.

The company offers a fully integrated product and service line which includes:

- Cathodic Protection System Design and Engineering
- Specialized Equipment/Materials Manufacture and Procurement
- Installation Services
- Systems Integration
- Maintenance
- Consultancy

In addition to its in-house engineering, equipment and materials offerings, RCT's close links and partnerships with Rawabi Holding companies and other technology partners enables the company to offer truly 'one-stop' solutions to corrosion control problems.

RCT's client list is extensive and includes the main construction and engineering contractors, consulting and design engineers, together with major end users such as Saudi ARAMCO, SABIC, the Royal Commission for Jubail and Yanbu, to name a few.
